DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims **1-2, 6-21, 25-30** have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims **1-2, 6-21, 25-30** are rejected under 35 U.S.C. 101 because:

Claim(s) **1, 13** is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent and recent Federal Circuit decision indicate that a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing.

An example of **a method claim** that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the

Art Unit: 2617

apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Note: the Examiner suggests amending at least one step in claim to positively recite the statutory item or device (user equipment “**mobile terminal**”, **base station**, **radio network controller**, etc.) that performs the step in order to '**tied**' the process to a particular statutory category.

Claim Rejections - 35 USC § 112

Claim **13** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim **13**, claim recited “...**further comprising the step** of selectively...” that was not supported by the original specification.

Claim Objections

Claims **1, 6, 10, 11** are objected to because of the following informalities: the terms (RT, NRT) should be clearly define, for example **real time** (RT); **not real time** (NRT).

Appropriate correction is required.

Allowable Subject Matter

Claims **31-38** are allowed.

Claims **1-2, 6-21, 25-30** are allowed.

If claim **1, 13** are overcome 35 U.S.C 101, and would be allowable if rewritten with qualify as a 101 statutory.
